

## Decorative Walking Stick & Cane Covers

People often use walking sticks to improve their mobility. However, the perception that they are functional medical devices can inhibit their adoption and use, which negates the benefits they provide. The Cane Expressions range of decorative walking stick covers is designed for this situation. Enabling people to quickly and easily customise their walking stick with a design of their choosing, allows them to see their walking stick as a fashion accessory and extension of themselves. This makes them more willing to use it. The Cane Expressions range of walking stick covers is competitively-priced making the benefits available to all. Other advantages of Cane Expressions include being able to identify your own walking stick quickly, and easily, protecting your walking stick from knocks, and enhancing an older or favourite walking stick.
